متن شماره ۲

In recent years, scientists try to use clean energy resources because they do not pollute the earth. Clean energy is renewable. It is made from resources that can be replaced, like wind, water, sunshine and tides. When renewable energy resources are used, the demand for fossil fuels decreases.

متن شماره ۳

(مکالمه دوم صفحه ۶۲ کتاب)

Mehran: Hi, Bijan. Are you OK?

Bijan: Hi, Mehran. I'm thinking about something.

Mehran: What's wrong?

Bijan: I've saved some money to buy a new mobile phone. But one of my friends is in trouble and needs some money. What would you do if you were in my shoes?

Mehran: What is his problem?

Bijan: I could tell you about it if it weren't a secret. But it's an emergency.

Mehran: OK. If I were you, I would give him the money. A friend in need is a friend indeed.

*متن شماره ۴

Reza: Hello, Ali. What are you doing?

Ali: Hi, Reza. I'm doing research on air pollution.

Reza: Oh, I see. Nowadays, it has become a great problem to our life.

Ali: Yes. Air is being polluted in many ways. And the most common reason is smoke. It is produced in big cities where many buses, trucks, and cars move on the roads.

Reza: Exactly. It also causes different diseases to human, such as heart attack and lung cancer.

Ali: So we all should be aware and protect our air from more pollution.

Reza: Sure. Good luck, Ali.
