Many students carry one because it is easy to use and can be very helpful when reading, writing, or speaking in English. A pocket dictionary is small, but it can provide a lot of useful information.</p> <p>When you open a dictionary, you will see many entries. An entry is a word and all the information about it. Some dictionaries also show collocations, which are words that often go together. For example, "make a decision" or "strong coffee" are common collocations.</p> <p>A pocket dictionary also gives you the pronunciation of a word. This helps you say the word correctly. You will often see the pronunciation written in symbols next to the word. These symbols tell you how the word sounds.</p>	۱۲

Some entries may also include an abbreviation. It is a short form of a word. For example, "n." means noun, and "adj." means adjective. Knowing these abbreviations will help you understand the information in each entry more quickly.

At the top of each page, you will see guide words. These are the first and last words on the page. **They** help you find words faster by showing you what words are included on that page.

Most dictionaries begin with an introduction. The introduction explains how to use the dictionary. It tells you what kind of information the dictionary gives, and what the symbols and abbreviations mean.

Using a pocket dictionary is a smart way to improve your English. It can help you understand new words, use **them** correctly, and pronounce them well. It also teaches you how words are used in real sentences. Next time you read or hear a new word, look it up in your dictionary. You will learn more than just the meaning!

5	<p>متن زیر را با دقت بخوانید و به سوالات آن پاسخ دهید.</p> <p>In recent years, scientists try to use other types of energy resources. They call them clean energy resources because they do not pollute the earth. Clean energy is renewable. It is made from resources that can be replaced, like wind, water, sunshine, tides, and plants. When renewable energy resources are used, the demand for fossil fuels is reduced.</p> <p>The most common type of clean energy is the solar power. Solar energy is produced by the radiation that reaches the earth. People have used the sun as a heat source for thousands of years. Iranians, for instance, use special designs and arrangements of windows, balconies and yards to get the most sunshine. Different types of materials might also be used in building the houses. This keeps people warm during cold seasons and cool during hot days of the year.</p> <p>Nowadays, solar energy can be converted into other forms of energy, such as heat and electricity. Solar energy might be used for heating water and air in homes, buildings, or swimming pools. Maybe you've seen buildings or houses with big shiny panels on the roof. These are solar collectors that collect heat by absorbing sunlight and producing solar power. Also, solar energy can be used in generating electricity to provide power for watches, highway signs, houses and even space stations.</p>	۱۳
